REGISTER OF RAINFALL IN 1897

Kept at Parkstone *in the County of* Dorset *by* R. H. Barnes

Latitude 50° 43' N.

Time of Observation 9 am

Longitude 1° 56' W.

RAIN GAUGE.

Diameter 5 inches

Height of Receiver above Ground 11 inches

" " " Sea Level 198 ft

NOTE.—Full instructions respecting the measurement of rain, and every detail connected therewith, are given in a little pamphlet, entitled, "*Arrangements for the Systematic Observation and Record of the Rainfall of the British Isles,*" which is supplied *gratis* on application to Mr. G. J. SYMONS, 62, Camden Square, London, N.W.

Accurate observers of rainfall will oblige by sending a copy of their record to Mr. G. J. SYMONS, of 62, Camden Square, London, N.W., for insertion in his annual tables of *British Rainfall*, which now contain returns from about 2,000 stations.

Additional Copies of this form (price 3d. each) can be obtained of the above, from Mr. STANFORD, 55, Charing Cross, and from all the leading opticians.

Lovely mild weather & dry

Dec 27 Gale of wind all morning culminating in a tremendous storm of wind and rain and slight hail at 12.15 – 12.30 noon then [illegible] dropped suddenly. ·54 fell before 3 PM

Total fall for the Year, 25·93 *in.* *No. of Days with a fall of ·01 in. or more,*..............

The Hon. Secretary (address, N. M. Richardson Esq., Montevideo, near Weymouth) will be much obliged if Observers will, if possible, send him their Returns in January on this form, which can be obtained on application, so that they may be preserved and uniformly bound for future reference. If the Monthly Totals only are sent, one or more of the Highest Falls in each Month and all Daily Falls of 1 inch or more should be inserted, but a daily record is more satisfactory, even if it is occasionally unavoidably interrupted. The 2 or 3 days should then be bracketed and the total fall given.

The Receivers of all Gauges should have a capacity of at least 6 inches.

Please insert opposite notes on Heavy Rainfalls, Gales, Thunderstorms, Temperature, and the weather generally, as well as any interesting Meteorological Phenomena.

Ap 23 I am a little bit doubtful as to the whether it fell previous to the 23rd. might be checked by other neighbouring gauges

Feb 21 Heavy Snowstorm

lovely mild weather & dry

Dec 27 Gale of wind all morning culminating in a tremendous storm of wind and rain and slight hail at noon 12.15 – 12.30 then [illegible] dropped suddenly. ·54 fell before 3 PM

Total fall for the Year, 25·93 *in. No. of Days with a fall of ·01 in. or more,*

The Hon. Secretary (address, N. M. Richardson Esq., Montevideo, near Weymouth) will be much obliged if Observers will, if possible, send him their Returns in January on this form, which can be obtained on application, so that they may be preserved and uniformly bound for future reference. If the Monthly Totals only are sent, one or more of the Highest Falls in each Month and all Daily Falls of 1 inch or more should be inserted, but a daily record is more satisfactory, even if it is occasionally unavoidably interrupted. The 2 or 3 days should then be bracketed and the total fall given.

The Receivers of all Gauges should have a capacity of at least 6 inches.

Please insert opposite notes on Heavy Rainfalls, Gales, Thunderstorms, Temperature, and the weather generally, as well as any interesting Meteorological Phenomena.

Ap 23 I am a little bit doubtful as to the whether it fell previous to the 23rd. might be checked by other neighbouring

Feb 21 Heavy Snowstorm
